

Operational processing of L3 and L4 products in the Arctic ended for the 2023/24 winter season. Operational processing of Antarctic L3 SMOS sea ice product has started.

Operational processing and dissemination of L3 and L4 sea ice thickness products in the Arctic for the 2023/24 winter season ended on 15 April, 2024. Reprocessing of L4 CS2SMOS product (r product) will continue until end of May. Operational L3 SMOS data for the southern hemisphere is now available from 15 April, 2024 on for the austral winter season.

The v3.3 L3 SMOS data from 2010 to 2023 for the southern hemisphere is available under <https://ftp.awi.de> and ESA server:
