Giant Box Corer

Attention:

Please note that the Giant Box Corer can only be operated upon request. Request operations with the Giant Box Corer to AWI-Geology and AWI-Logistics in sufficient time prior to the cruise. Operations of the system require experienced scientific staff on board. The system is <u>not</u> operated by the ship's crew.

Summary

The Giant Box Corer samples a comparable large area of the sediment surface $(50 \times 50 \text{ cm})$ with minimal disturbance and collects a large block of sediment up to 60 cm below the sea floor. This gear is particularly useful for quantitative investigations of the benthic micro- to macrofauna.
