Manufacturer	Kongsberg
Model	Joystick control system cJoy
Serial No	n/a
Type	Positioning System

Contacts

Role	Name
Engineer in Charge	Laeisz, Reederei

Components

The system consists of a joystick controller unit (cJoy controller) and an operator terminal for mounting into a console - the cJoy operator terminal. The terminal consists of a display, buttons and a computer built into a small cabinet allowing it to be fitted into existing consoles or mounted in areas where space is limited. The controller unit and the operator terminal communicate via a single network connection. The system provides interfaces to the thrusters and necessary sensors.

Position

Bridge
