

# SyncUnit

## Summary

The Kongsberg synchronizing unit, K-SYNC is designed to solve interference between different acoustic devices and instruments which can be a severe problem for ships with several acoustic instruments operating simultaneously. It controls proper timing of the instruments and the triggering of each instrument's transmission.

Manufacturer	Kongsberg
Model	K-SYNC
Serial No	n/a
Type	synchronizing unit

## Contacts

Role	Name
Engineer in Charge	Krockner, Ralf
Data Scientist	Krockner, Ralf
