

Official approvals for work onshore

Proposals for scientific work onshore

The chief scientist is responsible for obtaining required official approvals for work conducted on islands or on the mainland. Relevant information have to be acquired during expedition planning. Drawing of proposals, adherence to obligations and post-reporting are the sole responsibility of the **chief scientist**.

Helicopter usage

Necessary helicopter flights should be announced to the ship coordination at an early stage so that the helicopter operator may obtain flying, start and landing permissions.

For more information about helicopter usage see section [Helicopters](#)

Proposals for the ship

Please inform AWI ship coordination immediately in case the ship's call requires separate notification besides the diplomatic proposal.
