

Zodiac

There are 2 zodiacs onboard with aluminum floors and outboard motor and a dinghy made of synthetic material with paddles.

The zodiacs will be operated by crew members. Usage has to be announced to the chief scientist first.

Everybody has to wear a survival suit in the zodiac.

Survival suits (Helly Hansen E300-2 dry suits) are not present onboard. You need to lend a well-fitting suit from the AWI clothing storehouse. Please also order thermo insoles as well and wear warm socks with the suit.

(Photo:Hansen)

Advantages of the survival suit:

- Cold shock upon the sudden contact with the water is avoided.
- Uncontrolled breathing possibly under water during the first few seconds will not happen
- The danger of heart and circulatory system problems is reduced
- Danger of submersion is reduced.
- Freezing to death is delayed. Core temperature within the body decreases by 2°C in 6h.

Available on board:

2 x DSB 6.5 SR
