

SBE3plus temperature sensor

Attention:

The SBE3plus temperature sensor is part of the [CTD Probe with Carousel Water Sampler](#).

Summary

Intended primarily for use on the SBE 911plus profiling CTD system, the Seabird SBE3plus can also be used as a component in custom oceanographic systems or for high-accuracy industrial and environmental temperature monitoring applications.

Parameter

Parameter	Sensor output type	Unit
water temperature	temperature	°C

Position

Origin Description:	no xyz-position given. The SBE3plus is attached to the underwater unit of the CTD system.
