

SBE4 conductivity sensor

Attention:

The SBE4 conductivity sensor is part of the [CTD Probe with Carousel Water Sampler](#).

Summary

The Seabird SBE4 conductivity sensor is a modular, self-contained instrument that measures conductivity from 0 to 7 S/m, covering the full range of lake and oceanic applications.

Parameter

Parameter	Sensor output type	Unit
water conductivity	conductivity	mS/cm

Position

Origin Description:	no xyz-position given. The SBE4 conductivity sensor is attached to the underwater unit of the CTD system.
