

Reprocessed CryoSat-2 sea ice product v2.2 now available

The reprocessed data record for the AWI CryoSat-2 sea ice product (version 2.2) is now available on the [AWI ftp](#) (Nov 2010 - April 2019). The previous version is deprecated and has been removed. Updates of the reprocessed data stream will start with a delay of 33 days in early November and with 2 day delay for the near-real time data stream in early October.

Main Features of new Release

- Update of algorithm and file content
- Sea Ice Thickness Geotiffs for all weekly and monthly grids
