

§ Seminars and User Workshops

Every three months we offer a seminar on O2A components and services as well as other topics relevant to research data management.

If you have any questions, suggestions for topics or comments, please write to: :
[✉Lars.Harms@awi.de](mailto:Lars.Harms@awi.de)

Unless otherwise communicated, the seminar takes place **every three months on the first Wednesday of the month., 9:00-10:30 AM.**

The seminars take place online and can be reached via the following link: <https://awi.webex.com/awi/j.php?MTID=m188c33b30d187648f76f101111102b6f>

Could not attend training?
 Check seminar availability under "Related Items"

This is intended as an offer for you, however, as we are not always able to oversee which topics are of particular interest to you or which services still require explanation or an introduction, we need your support. Please feel free to contact us with any suggestion or comments you may have.

We will then try to incorporate these as best as possible.

Training Units

	DATE	TOPIC	PROVISIONAL AGENDA	RESPONSIBLE	RELATED ITEMS
1	2024				
2	04.12.2024				
3	04.09.2024				
4	05.06.2024	Data tables cleaning: checklist in R	This hands-on session aims to present an R script prepared by PANGAEA editors. It's designed to help dataset creators to check and resolve some common problems and issues with data tables, before submitting them to a data repository like PANGAEA. Furthermore, the script has also a more generic usage to help you with your data for example by finding typos or "copy and paste"-errors. This step-by-step procedure will be presented in R and is suitable for users with basic knowledge of R/RStudio. If you are interested in a Python version, please visit the PANGAEA Community Workshop.	Daniela Ransby	
5	06.03.2024	REGISTRY -- teasing O2A's metadata backbone	O2A's metadata management tool has been completely restructured, revised and expanded. With a new design and many new functions, it has also been rebranded. sensor.awi.de becomes REGISTRY. With this click-thru we want to show the basic operating concepts of the UI and the most important changes and features.	Norbert Anselm	
6	2023				
7	20.12.2023	Christmas break			
8	29.11.2023	User-Customizable Map Viewers	The Marine Data Portal provides map-based viewers for visual data exploration on the web. In addition to pre-curated viewers used to present selected research topics, data products, campaigns or projects, logged-in users can create their own custom viewers and publish them. In this seminar you will receive an introduction to the comprehensive functions of the viewer. You will be shown how you can use these and create simple data compilations to share them with your colleagues.	Robin Heß	<ul style="list-style-type: none"> • Portal Confluence Page • Marine Data Portal • Earth Data Portal
9	25.10.2023	Research SW Policy	<ol style="list-style-type: none"> 1. Research SW Policy at AWI - overview 2. Research Software Publication - Licenses and Citation <p>Abstract: The new guidelines for research software at the AWI will be presented in the seminar. It is intended to increase awareness of research software as a tool, but also as an output of scientific work. Best practices should be established to ensure the quality of research software. This also includes the publication and citation of software. The survey conducted at AWI on research software made it clear that there is often a lack of clarity regarding licenses. Therefore, in the second part of the seminar, Tobias Schlauch from DLR will give an introduction to software publishing and licenses.</p>	Bernadette Fritzsche	

10	04.10.2023	Introduction to ANVIO	Cheaper, higher-quality sequencing technologies have made 'omics analyses – metagenomics, pangenomics, phylogenomics, and more – central to investigations of microbial ecology and evolution. Anvi'o is a community-driven software platform enabling integrated analyses and interactive visualization of these multi-'omic data. It offers a versatile set of programs for working with sequence data that researchers can mix and match according to their research questions. While this can present a steeper learning curve than a simple data-in-results-out pipeline, it is not as difficult as you might think. In this talk, Iva Veseli (HIFMB) will introduce the anvi'o platform, discuss the various ways to learn and use anvi'o, and demonstrate how these strategies fit different research needs and users with different levels of computational experience.	Iva Veseli	Introduction to Anvio presentation
11	30.08.2023	CANCELED			
12	26.07.2023	Summer break			
13	28.06.2023	Introduction to the Nagoya Protocol	On access to genetic resources and the fair and equitable sharing of benefits arising from their utilization	Rebecca Aepfler	Nagoya Protocol Presentation
14	31.05.2023	Albedo, the new Ollie	In this seminar we will introduce the AWI's Albedo HPC System. The computer's hardware will be introduced along with a beginner introduction to using the machine, including recommended storage locations, available software, and usage of the batch system for scheduling your computations	Paul Gierz	VideoRecording.mp4
15	26.04.2023	Rasdaman	News from Datacube Land: rasdaman, Standards, and Federation	Peter Baumann	News from Datacube Land - Rasdaman
16	29.03.2023	Easter break			
17	22.02.2023	Drift&Noise	Navigating Icy Waters: Harnessing Earth Observation and AI for Optimal Polar Routes	Lasse Rabenstein	Navigating Icy Waters Presentation
18	25.01.2023	GitLab	Introduction to Gitlab.awi.de	Nico Harms	
19	2022				
20		Christmas break			

21	30.11.2022	Dataflows in O2A Framework	<p>Digital data Acquisition–Mobile Apps and Tools for Data acquisition:</p> <ul style="list-style-type: none"> • Voice recognizing data acquisition • How to document events in the field (Mobile Event Log) • Citizen science app based (MyThaw) 	<p>Data Logistics Support group (DLS):</p> <ul style="list-style-type: none"> ▪ Norbert Anselm ▪ Maximilian Betz ▪ Janik Eilers ▪ Sebastian Immoor ▪ Rebecca Lauerburg 	 <p>DLSIntroAWI.pdf</p>
22	26.10.2022	Autumn break			
23	28.09.2022				
24	31.08.2022	Summer break			
25	27.07.2022	Summer break			
26	29.06.2022	Unlocking the potential of ML for Earth and Environment researches	<p>Abstract:</p> <p>As Helmholtz AI Consultants, we support Helmholtz-based researchers on making the best use of ML methods for research questions related to Earth and Environmental sciences. This talk will introduce you to the way we work and what we have on offer for you. We will give insights into typical problem statements from Earth observation and Earth System modelling that are good candidates for experimentation with ML methods and report on our accumulated experience tackling such challenges with individual support projects. Given sufficient amounts of data and initial scientific problem statements, we work towards assembling practically meaningful demonstrators within a couple of months, laying the groundwork for further research projects. Example projects include wind speed regression on GNSS-R data, emulation of atmospheric chemistry modeling, Earth System model parameterizations with ML, marine remote sensing and time series analysis. We are happy to share our experiences and discuss the development of ML methods, prototypes and projects based on your input and scientific needs.</p>	Tobias Weigelt (DKRZ)	
27	25.05.2022	Pentecost break			

28	27.04.2022	GFBio: Publish your sequence s with metadata	<p>General Introduction (15 min)</p> <ul style="list-style-type: none"> Data submission as part of Research Data Management GFBio's single point of entry for submitting data to ENA & PANGAEA NFDI4Biodiversity as a sustainability concept <p>Introduction to MlxS (15 min)</p> <ul style="list-style-type: none"> What is MlxS Packages available Examples ENVO - the Environment Ontology MlxS and ENVO together <p>Demo (30 min)</p> <ul style="list-style-type: none"> Submission template for sequence data Available fields (default fields and suggested for FAIRness) Walk-through example with a glimpse behind the curtains 	<ul style="list-style-type: none"> Jimena Linares (GFBio e.V.)
