

C-Star Transmissometer

 **Attention:**
The Transmissiometer is part of the [CTD Probe with Carousel Water Sampler](#).

Summary

The C-Star transmissometer realizes underwater measurements of beam transmittance. The transmissometer used with the CTD probe ist a WETLabs C-Star.

Parameter

Parameter	Sensor output type	Unit
transmission	transmission	%

Position

Origin Description:	no xyz-position given. The transmissometer is attached to the underwater unit of the CTD system.
