

ECO FL fluorometer

**Attention:**

The fluorometer is part of the [CTD Probe with Carousel Water Sampler](#).

Summary

ECO FL fluorometer measure fluorescence from chlorophyll-a. Chlorophyll-a fluorescence is an indicator of active phytoplankton biomass and chlorophyll concentrations.

Parameter

Parameter	Sensor Output Type	Unit
chlorophyll A concentration	chlorophyll a	µg/l

Position

Origin Description:	no xyz-position given. The transmissometer is attached to the underwater unit of the CTD system.
