

RAMSES-ARC hyperspectral radiance meter (SN8474)

Summary

The RAMSES-ARC hyperspectral radiance meters is used to measure upwelling and sky-leaving radiance.

Manufacturer	TriOS GmbH
Model	RAMSES-ARC
Serial No.	847b
Type	radiometer
REGISTRY-Link	REGISTRY (8657)

Position

Info	no xyz-position given. Device is installed on the foremast.
X	0.0 (no unit given) (no description given)
Y	0.0 (no unit given) (no description given)
Z	0.0 (no unit given) (no description given)

Parameters

Parameter	O2ARegistry Output Type	Unit
radiance	direct radiation	W/m2
