

Meetings AI-Group

The AI-Group is an open and informal group of colleagues from various AWI-departments, aimed at providing an opportunity to exchange information and ideas related to the use of artificial intelligence and machine learning, in particular:

- to present and discuss current or past research activity in which AI is employed,
- to discuss technical topics (e.g. installation, updates) regarding software and AWI-infrastructure related to AI.

The group is open to non-AWI members.

The group meetings are held virtually over WebEx and occur once a month. We try to schedule the meetings on the first Tuesday of each month at 9 a.m.; variations to this rules are normally due to holidays. An invitation and a reminder e-mail are sent to the group mailing list before each meeting.

If you would like to be added to the mailing list or have any other question, you can contact [Stefan Pinkernell](#) or [Giorgio Busatto](#).

Here below you can find information about recent and future meetings.
