

Step 2b - Sensor installed on a platforms with satellite link (Near RealTime data transmission)

This step describes sensors which are connected to small platforms e.g. bouys, glider, etc., for platforms itself, e.g. satellites, and especially for vessels and stations that are **not** equipped with a DSHIP system.

Use the ingest tab in sensor.awi.de (see spaces.awi.de/x/kaG0FQ for detailed procedure).

If these few information are compiled, it is time for [step 3...](#)
